Observational Study Evaluating Rituximab Use and Use of the Patient Alert Card in Participants Receiving Rituximab Infusion for a Non-Oncology Indication at Infusion Centers in Europe

Trial Status
Completed

Trial Runs In
5 Countries

Trial Identifier
NCT02654379 BA28478

The source of the below information is the publicly available website ClinicalTrials.gov. It has been summarised and edited into simpler language.

Trial Summary:

This study is to characterize the indications for which rituximab is being used and to evaluate the use of the Patient Alert Card (PAC) in participants receiving the medication for non-oncology conditions at infusion centers. The study involves the retrospective chart review of rituximab users' medical records in non-oncology indications as well as a survey to collect information on participant characteristics, and will include questions about participant knowledge on the risk of infections, participant receipt and review of the PAC, and any actions the participant has taken as a result of receiving the PAC.
